

# Main Application Entities Diagram

Last updated by | Oleksandr Varshavskyi | Nov 8, 2023 at 11:04 AM GMT+2

\*FinancialSpace record appears at the moment of assigning some customer to some Financial Planner or Specialist

## Implementation notes:

- **This diagram shows the main application's entities and relations between them on a conceptual level** and doesn't represent all application entities.
- The number of fields inside of entities can/should be extended based on the functional requirements and would depend on the amount of user's, financial's, etc. data.
- Some other entities should be added as well using the same rule as above.
